GitHub:github.com/Mahyarelect

Computer Engineering student at Sharif University of Technology , *familiar with automation tools and cloud fundamentals. Eager to learn how data platforms are built, how distributed systems handle large datasets, and how to create reliable workflows for data science and AI teams – from data preprocessing and model training to deployment and monitoring.*

SKILLS

- Docker
- Git
- Python Libraries (Pandas, Numpy, Matplotlib, Seaborn, Scikit-learn, Keras, ...)

PROGRAMMING

- Java
- Python
- C
- SQL (PostgreSQL , MongoDB)

CONCEPTS

- DevOps culture
- Monitoring basics
- OOP

SOFT SKILLS

- | | |
|---------------------------------------|-------------------------------|
| • Teamwork | • Knowledge sharing |
| • Clear communication | • Positive work attitude |
| • Patience in complex problem solving | • Curiosity and deep learning |
| • Documentation-driven learning | • Reliable and hardworking |

LANGUAGES

Persian — Native

English — Working proficiency

EDUCATION

B.Sc. Computer Engineering

2023 – Present

Sharif University of Technology — Tehran

Related Courses

- Fundamentals of Programming — 20
- Advanced Programming — 18.6
- Data Structures & Algorithms — 19
- Computer Structure — 17
- Design of Algorithms — 17.5
- Linear Algebra — 20

PROJECTS

SGit

Implemented a simplified version control system in C with commands such as init, add, commit, log, diff, merge, reset, and stash. The project interacts directly with the Linux filesystem to manage repository state, track file changes, and maintain commit history.

Gwent-online

Implementation of the Gwent card game using JavaFX, including a simple multiplayer mode over the network.
